

BHARAT INDSOL

PRODUCT LIST :-

ESP SPARES, BAG FILTER SPARES, EXPENSION
BELLOW'S, VALVE'S, FLANGE, STRAINER

BHARAT IND SOL CAN SUPPLY ALL SPARES THAT MAY BE REQUIRED FOR ORIGINALLY SUPPLIED AIR POLLUTION CONTROL (APC) EQUIPMENT

ELECTROSTATIC PRECIPITATORS

- Differential Pressure Switch
- Emitting/Discharge Electrode
- Collecting Plate/Electrode
- Gas Distribution Screen
- Top & Bottom Hanger/Tacipole
- Access Door
- Explosion Vent/ Door
- Expansion Joint
- Anvil Cap
- Alignment Rake
- Grounding Switch
- Pneumatic Vibrator
- Electro Pneumatic Vibrator
- TR Set Components:
- TRCC Controller
- Firing Module Card
- PLC Card
- E-Prom
- Firing Module Card
- HMI/ Display Unit
- SMPS/Power Supply Card
- DC Controller/Thyrister
- Unit
- CPU-224/226
- Support Insulator
- Support Insulator Gasket
- Support Insulator Heater
- Bus Duct Seal
- Shaft Insulator
- Hypalon Boot
- Hypalon Boot End Clamps
- Rapper Distribution Panel
- Rapper Coil
- Dry type panel filter
- Rotary Airlock Valve
- Slide Gate
- Diodes
- Thermostat
- Temperature element/RTD
- Hopper Heater Pad
- Level Switch
- Zero Speed Switch
- HT and LT Bushing
- SMPS/ Power Supply
- Card
- Gas & Oil relay
- Time Totalizer
- Microtapper Panel Components
- < Row Card
- Column Card

BHARAT INDSOL CAN SUPPLY ALL SPARES THAT MAY BE REQUIRED FOR ORIGINALLY SUPPLIED AIR POLLUTION CONTROL (APC) EQUIPMENT

BAG FILTERS/ REVERSE AIR BAG HOUSES

- Temperature Indicating Controller
- Differential Pressure Switch
- Filter Indicating Regulator
- Temperature Element/RTD
- Explosion Door/ Rupture Disc
- Control Panel or its components
- Rubber Hose & Clip
- Rubber Beading
- Explosion Vent
- Pressure Switch
- Expansion Joint
- Pulse & Solenoid Valve
- Spark Arrestor
- Access Door
- Pneumatic Cylinder
- Manometer
- Pressure Gauge
- Pressure Transmitter
- Thimble
- Clamp for Bag
- Filter Bags
- Cages
- Venturies.
- Proximity Switch
- Rotary Airlock Valve
- DFDV
- Slide Gate
- Limit Switch
- Hopper Heater Pad
- Thermostat
- Zero Speed Switch
- Level Switch
- J Hook Assembly
- Poppet Damper
- RA Damper
- Inlet-cum-Bypass Damper (ICBD)
- Sequential Controller/Timer
- Master Sequential timer (for off-line Bag Filter)

DRIVEN BY A COMMITMENT TO OFFER SPARES AND SERVICES THAT MAY BE REQUIRED

ADVANTAGES OF PROCURING GENUINE SPARES FROM THERMAX

- Assurance of quality
- Assurance of correct specifications and compatibility to the original equipment
- Guaranteed performance
- Reduced risk of failure of parts leading to plant downtime and monetary losses
- Recommendation from the OEM towards performance enhancement with change-over-kits
- Thermax Support in the entire process from procurement to re-commissioning
- To ensure proximity to customers, Thermax extensively mapped and positioned the Thermax Channel Associates (TCAs) with enhanced reach and speedier response in mind. The TCAs' close understanding of the market complements Thermax's business philosophy of Improving your business is our Business.
- Regional service hubs are also at hand to support installations if required

**AVAILABLE FOR
ELECTROSTATIC
PRECIPITATORS**

DURING THE COMPLETE LIFE-CYCLE OF AIR POLLUTION CONTROL EQUIPMENT SUPPLIED

WHY IT IS ALWAYS BETTER TO SOURCE SPARES FROM THERMAX THROUGH THEIR AUTHORIZED REPRESENTATIVES?

- Today's fiercely competitive markets make maximization of plant uptimes a big necessity making it critical to plan the procurement of essential spares and maintain an optimum inventory of the same
- Having the right quality of spares is as important as the quantity aspect mentioned above.
- Customers often end up in forced repeat purchases of a component (if not sourced properly), or even suffer the loss of a production batch the cost implication of which is higher than the failed spare part
- Again, Thermax, in view of a constant endeavour to improve the quality of products/performance, keeps coming up with design changes/better components. They or their authorized representatives alone can recommend to customers on changeover-kits to enhance efficiency/achieve operational savings of existing equipment, an output of such improvement measures introduced.
- Thermax TCAs, assisted by field service engineers whenever required, play an important role in advising customers on the when/what and how much aspects of stocking. They will of course be at hand in the procurement process by finalizing the order for parts and loading and expediting the same with Thermax, and subsequently during installation if desired.
- Select TCAs are today are further gearing up by both locally stocking spares for Air Pollution Control equipment & developing a dedicated team trained to service their customers themselves.

**AVAILABLE FOR
BAG FILTERS**
